DETAILED ACTION

1. Claim 1 has been presented for examination.

Priority

2. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 2 of prior U.S. Patent No. 6,701,288. This is a double patenting rejection.

Allowable Subject Matter

- 5. Claim 1 is allowed over the prior art of record, PROVIDING 101 STATUTORY DOUBLE PATENTING
 15568 ARE RESOLUED. RET
- 6. The following is an examiner's statement of reasons for allowance:

The best prior art of record is US Patent No. 4,964,060, issued to Hartsog et al. on December 16, 1990, filed on December 4, 1985.

Hartsog discloses a CAD tool for checking a building plan, including code prompting and receiving from the user a user to provide information comprising a design area for a sprinkler system (column 2 lines 54-58, sprinkler system taught in figure 2a reference 56) and a requirement of a standard related to at least one sprinkler element (column 22 lines 8-15, types of plumbing fixtures), accessing from memory the requirement of the standard (column 22 lines 19-26), and designing and displaying on a computer display a layout for the sprinkler system within the design area in compliance with the standard (column 23 lines 14-23, also lines 54-55). However, Hartsog does not disclose designing the layout of the sprinkler system to avoid intersecting with the building elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - US Patent no. 3,867,616, issued to Korelitz et al. February 1975.
 - US Patent no. 4,551,810, issued to Levine in November 1985.
 - US Patent no. 4,613,952, issued to McClanahan in September 1986.
 - US Patent no. 4,700,317, issued to Watanabe et al. in October 1987.
 - US Patent no. 4,885,694, issued to Pray et al. in December 1989.
